

MODIFICATIONS

- * Modification of the ATC, or removal of original equipment, may render the vehicle unsafe or illegal.
- * Spark arresters and mufflers are required in most areas. Don't modify your exhaust system. Remember that excessive noise bothers everyone and creates a bad image for off-road vehicles.

LOADING AND ACCESSORIES

WARNING

- * *To prevent an accident, use extreme care when adding and riding with accessories and cargo. Addition of accessories and cargo can reduce the ATC Big Red's stability, performance, and safe operating speed. Slow down (15 mph or less) when loaded with cargo or pulling a trailer.*

The combined weight of the rider, cargo, and all accessories must not exceed **170 kg (375 lbs)** which is the vehicle capacity load.

The following loading and towing capacity data is valid only when the riding terrain is level and flat. For different riding terrains, you must exercise your own judgement to load and ride the ATC safely. Never exceed the loading capacities given here.

1. Load cargo on the rear carrier as far forward as possible. Do not allow cargo to extend beyond the end of rear carrier.

Front carrier	10 kg (22 lbs)
Rear carrier	45 kg (100 lbs)
Storage compartment	2.3 kg (5 lbs)

2. When towing a trailer, care should be taken to maintain balance and stability. Place cargo in the trailer so that it will not cause the front wheel to lift off the ground during travel.

Tow weight (Trailer plus cargo weight)	383 kg (850 lbs)
Tongue weight (Weight on hitch point)	14 kg (30 lbs)

3. Do not obstruct the headlight beam with cargo.
4. Do not ride with a passenger on the rear.
This ATC is not designed to carry a passenger.
