3 Backlight brightness adjustment:

You can adjust the brightness to one of three levels.

❶ Press the ｜SEL｜ button. The brightness is switched.

❷ Press the ｜SET｜ button. The backlight is set, and then the display moves to the activating/deactivating of tripmeter A, average fuel mileage and fuel consumption automatic reset mode.

4 Activating/deactivating of tripmeter A, average fuel mileage and fuel consumption automatic reset mode:

You can activate or deactivate the automatic reset mode by refuelling after 1st (E) segment of the fuel gauge starts flashing. Deactivation is initially set.

❶ Press the ｜SEL｜ button to select "*On*" (activate) or "*OFF*" (deactivate) in the automatic reset mode.

❷ To end the selection, press the ｜SET｜ button. The activation/deactivation of automatic reset mode is set, and then the display moves to the setting of HISS indicator (HISS indicator comes on).
