

## Engine Oil & Filter

This procedure requires mechanical skill and professional tools such as a torque wrench and oil filter wrench, as well as a means for disposing of the drained fluid (page 188 ). If you do not have the skills or the tools, see your Honda dealer.

### *Drain the Engine Oil:*

1. Park the motorcycle on its side stand on a firm, level surface.
2. Remove the lower cowl (page 111 ).
3. If the engine is cold, start it and let it idle for 3–5 minutes. Turn the engine off. Wait 2–3 minutes for the oil to settle.
4. Place a drain pan under the crankcase.

5. To drain the oil, remove the oil filler cap, engine oil drain bolt ( 1 ), and sealing washer ( 2 ).

### FRONT, UNDER ENGINE

- (1) engine oil drain bolt  
(2) sealing washer
