

Tires & Tubes

Tire Replacement

The tires that came on your CRF were designed to provide a good combination of handling, braking, durability, and comfort across a broad range of riding conditions.

⚠ WARNING

Installing improper tires on your motorcycle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tires recommended in this owner's manual.

| | | |
|-------|-----------------|--------|
| Front | 80/100 – 21 51M | |
| | DUNLOP | D742FA |
| Rear | 100/90 – 19 57M | |
| | DUNLOP | D756 |
| Type | bias-ply, tube | |

- When replacing, use the original equipment tires or equivalent tires of the same size, construction, speed rating, and load range as the originals.
- Replace the tube any time you replace a tire. The old tube will probably be stretched and, if installed in a new tire, could fail.
