

Parking

4. Use the helmet holder to secure your and your passenger's helmets to your motorcycle:
- Insert the ignition key and turn it counterclockwise to unlock the holder.
 - Hook the D-ring of the helmet onto the holder pin and push in the holder pin. Remove the key.
 - To install two helmets, route either end of the helmet set wire through the helmet's D-ring. Hook the loops of the helmet set wire onto the holder pin and push in the holder pin. Remove the key.

Remove the helmet set wire and secure it to the bottom of the left saddlebag with the band when it is not used.

NOTICE

Riding with a helmet attached to the helmet holder can cause damage to the helmet, or damage to the paint or finish of your motorcycle.
